DIPLOMA SUPPLEMENT

This Diploma Supplement model was developed by the European Commission, the Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification, to which this supplement is appended. It should be free from any value judgments, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should be given.

1. INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

1.1 Family name(s)

1.2 Given Name(s)

1.3 Date of birth (DD/MM/YY)

1.4 Student identification number or code (if available)

(i) **Structure**
Tertiary Education is provided by the Greek Tertiary Educational Institutions (TAIs). TAIs are totally self-governed legal entities of public law supervised by the Ministry of Education and Religious Affairs. Tertiary Education consists of two distinct parallel sectors: (a) the university sector, which includes the Universities, Polytechnics, and the Athens School of Fine Arts, henceforth referred to as "Universities", and (b) the technological sector, which includes the Technological Educational Institutes (TEIs) and the School of Pedagogical and Technological Education (SPTE), henceforth referred to as "T.E.I.". It should be noted that all TEIs of the country have merged with university institutions.

(ii) **Access**
Entrance to the various Schools of the **Universities (Panepistimio)** and **Technological Education Institutions (Technologiko Ekpaideftiko Idryma - TEI)** depends on the general score obtained by Lyceum graduates on the Certificate, on the number of available places (numerus clausus) and on the candidates' ranked preferences among schools and sections.

(iii) **Qualifications**
Students who successfully complete their studies in universities and TEI are awarded a Ptychio (first cycle degree). First cycle programmes last from four years for most fields to five years for engineering and certain other applied science fields and six years for medicine. The Ptychio leads to employment or further study at the post-graduate level that includes the one year second cycle leading to the second degree, Diploma Metaptychiakon Spoudon - equivalent to the Master's degree - and the third cycle leading to the doctorate degree, Didaktoriko Diploma. Legislation on quality assurance in Higher Education, the Credit Transfer System and the Diploma Supplement defines the framework and criteria for evaluation of university departments and for certification of student degrees. These measures aim at promoting student mobility and contributing to the creation of a European Higher Education Area. A detailed description of the Greek Education System is offered in: **EURYDICE (http://www.eurydice.org) database of the European Education Systems. http://eacea.ec.europa.eu/education/eurydice/documents/thematic_reports/122EN.pdf (pages 82,83)**
